on 26 august 1914 the world famous university library in the belgian town of louvain was looted and destroyed by german troops the international

community reacted in horror holocaust at louvain proclaimed the daily mail and the behaviour of the germans at louvain came to be seen as the beginning of a different style of war without the rules that had governed military conflict up to that point a more total war in which enemy civilians and their entire culture were now legitimate targets yet the destruction at louvain was simply one symbolic moment in a wider wave of cultural destruction and mass killing that swept europe in the era of the first world war using a wide range of examples and eye witness accounts from across europe at this time award winning historian alan kramer paints a picture of an entire continent plunging into a chilling new world of mass mobilization total warfare and the celebration of nationalist or ethnic violence often directed expressly at the enemy s civilian population

when a country is defeated in war not only are the policies strategies and goals of the military affected but those of society as well in this book experts in military history examine conflicts ranging from the american revolution to the arab israeli wars of 1967 and 1973 and to china s invasion of vietnam in 1979 to show how the trauma of defeat also affects the evolution of society the authors argue that recovery from defeat must be assessed on the level of grand strategy that ultimate responsibility for recovery rests on the capacity of a nation s top political and military leaders to use their society s resources in order to master the challenges confronting them sometimes a nation can rebound from defeat simply by re forming or reorganizing the military services and the branches of government involved in military decisions at other times military defeat can have a greater impact on society leading to the consolidation of the status quo the disruption of the traditional social order or increased civilian control over the military in any case the leadership s viability often hinges on its ability to detect the inevitable pressures for reform that follow military defeat and to harness them accordingly

from the treaty of versailles to the 2018 centenary and beyond the history of the first world war has been continually written and rewritten studied and contested producing a rich historiography shaped by the social and cultural circumstances of its creation writing the great war provides a groundbreaking survey of this vast body of work assembling contributions on a variety of national and regional historiographies from some of the most prominent scholars in the field by analyzing perceptions of the war in contexts ranging from nazi germany to india s struggle for independence this is an illuminating collective study of the complex interplay of memory and history
